

Welcome to Imagine+ Math!

Dear parents, family members, and caregivers,

Your school district has partnered with Imagine+ Math to provide students with a personalized learning program that maximizes their academic growth in math. Your student's individualized learning path features interactive, engaging lessons that adapt to their unique needs and strengthen their academic skills. To learn more about Imagine+ Math, visit imaginelearning.com/products/#math.

Your Student's Experience in Imagine+ Math

Imagine+ Math uses high-quality, engaging videos, rigorous problem solving, and illustrative visuals to teach and practice math concepts that help your student build a solid academic foundation and master academic concepts. The benchmark assessment chosen by your student's school identifies their current skill level and then uses that data to create an individualized learning path for your student.

As your student completes lessons in Imagine+ Math, their individualized learning path continuously adapts to their performance level so that they can learn and practice the skills they need to be successful. As your student engages with each lesson, they can also earn stars and unlock avatars and backgrounds to customize their learning environment.

Using Imagine+ Math at Home

We encourage your student to work on Imagine+ Math at home. Your student can access Imagine+ Math in a web browser from any computer or tablet by logging in with the URL and login information below. Check help.imaginelearning.com to ensure that your computer or tablet meets the minimum technical requirements.

Supporting Your Student's Progress

Follow these recommendations to help your student succeed in Imagine+ Math this school year.

- Provide a distraction-free workspace and encourage your student to be thoughtful and attentive as they complete their work.
- Review any worksheets or lessons assigned by your student's teacher.
- Review your student's performance with their teacher. Discuss their overall progress, growth, and test results, as well as any skill areas where they may be struggling.
